Power BI Developer (Data Engineer)

WeCare

NHS
Barts Health
NHS Trust

OurVision To be a high-performing group of NHS hospitals, renowned for excellence and innovation, providing safe and compassionate care to our patients in east London and beyond.

WeCare about our ambition for excellence

Our WeCare values shape everything that we do, every single day. They are visible in every interaction we have with each other, our patients, their families and our partners.

WeCare about everything from the appointment letters our patients receive, to the state of our facilities when they walk through the door, to the care and compassion they receive when they are discharged. WeCare that the people who join our trust will hold the same values as we do, so our values are embedded within our recruitment and selection processes. WeCare that you feel valued working here, so our values also guide our training and development and performance and talent management. WeCare about working with suppliers that live and breathe our values too.

We have come a long way on our journey to delivering safe and compassionate care. By embracing these values as the way we behave around here, we will achieve our ambition for excellence.

Value	Key behaviours	
W WELCOMING	• Introduce yourself by saying "Hello, my name is …" • Smile and acknowledge the other person(s) presence • Treat others as you would wish others to treat you	• Ensure the environment is safe and pleasant for our patients, our colleagues and our visitors
E ENGAGING	• Get involved in making improvements and bring others with you • Encourage feedback from patients and colleagues and respond to it • Acknowledge efforts and successes; say thank you	• Use feedback to make improvements, and empower colleagues to do this without needing to seek permission • Appreciate that this may be a new experience for patients and colleagues; help them to become comfortable
C COLLABORATIVE	• Give time and energy to developing relationships within and outside own team • Demonstrate pride in Team Barts Health	• Respect and utilise the expertise of colleagues • Know your own and others' part in the plan
A ACCOUNTABLE	• Always strive for the highest possible standard • Fulfil all commitments made to colleagues, supervisors, patients and customers • Take personal responsibility for tough decisions and see efforts through to completion	• Admit mistakes, misjudgements, or errors; immediately inform others when unable to meet a commitment; don't be afraid to speak up to do the right thing • Do not pretend to have all the answers; actively seek out those who can help
R RESPECTFUL	• Be helpful, courteous and patient • Remain calm, measured and balanced in challenging situations	• Show sensitivity to others' needs and be aware of your own impact • Encourage others to talk openly and share their concerns
E EQUITABLE	• Value the perspectives and contributions of all and ensure that all backgrounds are respected • Recognise that individuals may have different strengths and needs, and that different cultures may impact on how people think and behave. Be curious to find out • Work to enact policies, procedures and processes fairly	• Be open to change and encourage open, honest conversation that helps foster an inclusive work and learning environment • Remember that we all have conscious and unconscious bias; get to know what yours are, and work to mitigate them

Barts Health NHS Trust

Job Particulars

Job Title	**Power BI Developer (Data Engineer)**
Contract type	Fixed Term Contract – 12 months
Pay Band	8a
Location	Canary Wharf
Reports to	Strategic Technologies Programme Manager
Responsible to	Associate Director of Data Modelling and Architecture

1. Job Purpose

Barts Health NHS Trust is migrating its analytics and reporting estate from Qlik to Microsoft Fabric with Power BI, supported by a third-party Centre of Excellence (CoE) delivery partner. This is a newly created, fixed-term post established to provide dedicated internal capacity throughout the transition, protecting business-as-usual (BAU) reporting while the Trust builds sustainable in-house Power BI and Fabric capability.

This post is fixed term for 12 months to support the Trust's transition from Qlik to Microsoft Fabric with Power BI. The post holder will spend an initial period shadowing and working closely with the ANS Centre of Excellence team, shadowing and knowledge-transferring on Microsoft Fabric architecture, data modelling, and Power BI development, before taking on an increasing share of platform build, validation, and support responsibilities as the migration progresses. The role will support both the migration of existing Qlik dashboards and the development of new Power BI reporting in response to operational and clinical needs.

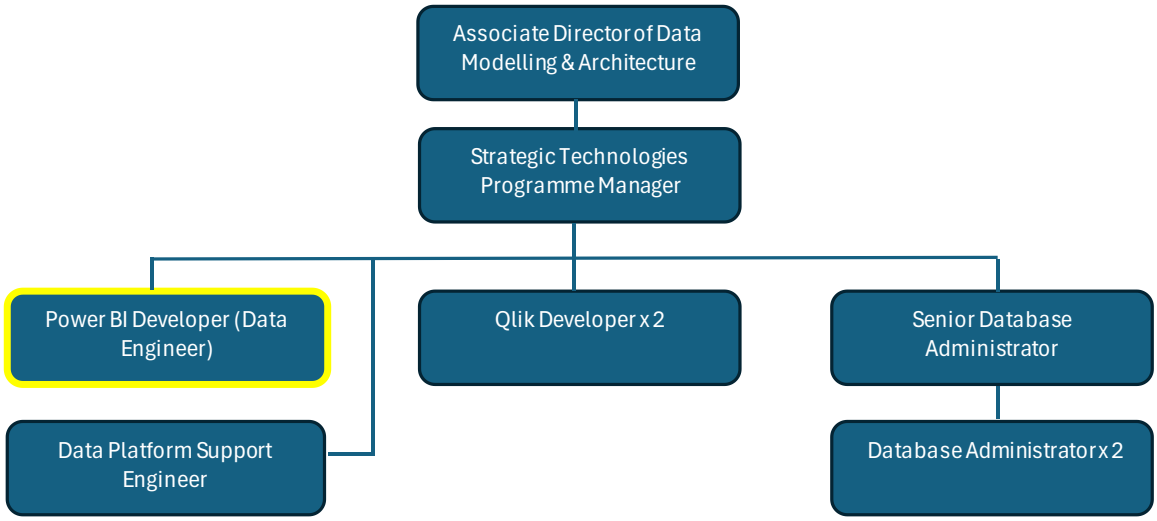

The post holder will work closely with the CoE delivery partner during Year 1,

2. Key Working Relationships

Internal	External
Strategic Technologies Programme Manager	ANS Group Centre of Excellence (CoE) consultants and engineers
SQL/Reporting Layer Team Lead and wider BIU reporting team	
Existing Qlik development team	
Site and divisional operational, clinical, and performance teams	
Information Governance team	

3. Structure Chart

4. Main duties, responsibilities and results areas

Platform Migration and Development

- Lead the technical delivery of complex Power BI and Microsoft Fabric development activities, ensuring solutions are scalable, secure, and aligned with Trust reporting requirements
- Work alongside the ANS Centre of Excellence team to learn and apply Microsoft Fabric and Power BI development standards, including data modelling, DAX, and report design.
- Act as the Trust's subject matter expert for Power BI and Microsoft Fabric during the migration
- Support the migration of prioritised dashboards from Qlik to Power BI, in line with the agreed phased migration plan for the wider dashboard estate.
- Identify and resolve complex technical issues arising during migration activities, ensuring minimal disruption to business-critical reporting services.Validate migrated dashboards against existing Qlik outputs during the parallel-running period to confirm data accuracy and build user confidence.
- Contribute to the configuration and ongoing maintenance of data mirroring, semantic models, and workspace structures within Microsoft Fabric and OneLake.

Governance, Quality, and Support

- Lead the assurance and quality review of migrated reporting products, ensuring compliance with agreed technical, governance and information standards.
- Apply agreed data governance, security, and row-level access standards consistently across published reports.

- Support formal reconciliation and sign-off processes for migrated dashboards prior to Qlik decommissioning.
- Provide first-line support and troubleshooting for Power BI reports and dashboards, escalating platform-level issues to the CoE/managed service as required.
- Develop and implement robust testing, validation and reconciliation processes to ensure continuity, accuracy and integrity of reporting outputs throughout the migration programme.
- Monitor and manage technical risks relating to dashboard migration, escalating significant issues and proposing mitigations to support programme delivery.
- Maintain documentation of report logic, data lineage, and development standards to support long-term supportability and knowledge retention.

Stakeholder Engagement

- Translate complex business requirements into technical specifications and analytical solutions that support operational performance management and decision-making.
- Present complex technical information to a wide range of audiences, adapting communication style to ensure understanding by both technical and non-technical stakeholders.
- Establish effective working relationships with internal and external partners to support successful programme delivery and adoption of the new reporting platform.

Programme Delivery and Service Improvement

- Lead designated workstreams within the dashboard migration programme, ensuring delivery against agreed milestones, quality standards and timescales.
- Identify opportunities to improve reporting efficiency, automation and user experience through the enhanced capabilities of Microsoft Fabric and Power BI.
- Evaluate emerging technologies, tools and methodologies within the Microsoft analytics ecosystem and advise on their potential application within the Trust.

Knowledge Transfer and Team Development

- Actively participate in structured knowledge-transfer activities with the CoE team to build sustainable in-house Power BI and Fabric capability.
- Work collaboratively with the existing Qlik development team to support dual-platform capability during the transition period.
- Support the development of internal training materials, templates, and best-practice guidance for Power BI report developers across the Trust.
- Contribute to local champion and peer-support arrangements to help embed self-service reporting capability across operational teams.

General

- Act as a senior Power BI lead for the programme implementation
- Work closely with operational, clinical and corporate teams to understand their requirements and advise on future developments.

- Work within the Trust's information governance, data protection, and clinical safety policies at all times. Work closely with operational, clinical and corporate teams
- Contribute to programme reporting, highlighting risks, issues, or delays relevant to migration progress.
- Undertake any other duties commensurate with the band and purpose of the post, as reasonably required.

5. Working conditions

Criteria	Description
Physical	No Manual handling skills required
Emotional	None emotional effort required
Working Conditions	Administrative post required to work across NHS locations
Mental	Good problem solving and multi-tasking capabilities are required to react to customer requirements.

NHS Manager's Code of Conduct

As an NHS manager, you are expected to follow the code of conduct for NHS managers (October 2002). www.nhsemployers.org/

Safeguarding adults and children

Employees must be aware of the responsibilities placed on them to maintain the wellbeing and protection of vulnerable children and adults. If employees have reason for concern that a patient is 'at risk' they should escalate this to an appropriate person i.e. line manager, safeguarding children's lead, matron, ward sister/change nurse, site manager, consultant (October 2002). www.nmc-uk.org/

About Barts Health

Our group of hospitals provide a huge range of clinical services to people in east London and beyond.

We operate from four major hospital sites (The Royal London, St Bartholomew's, Whipps Cross and Newham) and a number of community locations, including Mile End hospital. Around 2.5 million people living in east London look to our services to provide them with the healthcare they need.

The Royal London in Whitechapel is a major teaching hospital providing local and specialist services in state-of-the-art facilities. Whipps Cross in Leytonstone is a large general hospital with a range of local services. Newham in Plaistow is a busy district hospital with innovative facilities such as its orthopaedic centre. Mile End hospital is a shared facility in Mile End for a range of inpatient, rehabilitation, mental health and community services. And St Bartholomew's in the City, London's oldest hospital, is a regional and national centre of excellence for cardiac and cancer care.

As well as district general hospital facilities for three London boroughs, Tower Hamlets, Waltham Forest and Newham, we have the largest cardiovascular centre in the UK, the second largest cancer centre in London, an internationally-renowned trauma team, and the home of the London Air Ambulance. The Royal London also houses one of the largest children's hospitals in the UK, a major dental hospital, and leading stroke and renal units.

We're also proud to be part of UCLPartners, Europe's largest and strongest academic health science partnership. The objective of UCLPartners is to translate cutting edge research and innovation into measurable health gain for patients and populations through partnership across settings and sectors, and through excellence in education.
