Migrant's employment

Job title:	Data Engineer Support
Job type:	2133 IT business analysts, architects and systems designers
Summary of job description:	The Data Engineer Support will provide technical support and troubleshooting for data engineering platforms and pipelines. Monitor data workflows to ensure seamless ETL processes and timely data availability. Assist in maintaining and optimizing data infrastructure for reliability and performance. Collaborate with data engineers and analysts to resolve issues impacting data quality or availability. Manage user access, permissions, and documentation for data systems. Analyze system logs, diagnose failures, and help implement corrective measures. Support deployment, integration, and regular updates of data engineering tools. Address ad-hoc data requests and assist with reporting needs from business users. Ensure compliance with organizational data governance and security policies. Continuously learn new technologies and contribute to knowledge-sharing within the data team.
